5-Megapixel C-Mount Smart Camera
F440-F

User-configurable smart camera.

The **F440-F C-Mount Smart Camera** with **AutoVISION 5.3.0** user interface is a highly configurable smart camera with a 35 frame-per-second 5 megapixel monochrome global shutter sensor. The C-mount lens, external lighting options, and 5 megapixel sensor optimize the F440-F for virtually any machine vision applications.

The F440-F is pin-compatible with the MicroHAWK F430-F smart camera, ensuring a clear upgrade path with all the same wiring accessories.
AutoVISION – the intuitive setup tool for the F440-F – allows you to configure highly complex applications quickly and easily.

Features

- 5 MP monochrome global shutter sensor.
- 35 FPS image acquisition.
- Higher FPS using pixel binning and region of interest (ROI) modes.
- C-mount lens-compatible.
- External lighting-compatible (dedicated strobe output).
- Smallest smart camera in its class.
- IP40-rated.
- Support for Digital I/O, RS-232, Ethernet TCP/IP, EtherNet/IP™, and PROFINET communications.
- PoE (Power over Ethernet) or direct 24V.

System Configuration

* Select a PoE HUB when powering the camera via PoE through the Ethernet cable. Select a standard Ethernet HUB when powering the camera through the Power and IO cable. PoE is "Power over Ethernet". This is a global standard technology of power supply via LAN cable which makes it possible to install and use F440-F without a power supply and with just a single camera.

8. Lighting Options

The F440-F is designed for use with external lighting. It can be equipped with any vendor's continuous power or strobe lighting. Strobe lights are triggered using Output 3 on the M12 IO connector through a flying leads cable.

Omron also offers a line of Smart Lights that can be used in continuous or strobed mode. NERLITE Smart Series Lights have a built-in strobe controller, so no external strobe controller is needed. Dedicated cable sets allow you to wire the NERLITE Smart Series Lights directly to the F440-F.
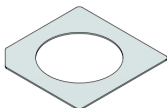

NERLITE Smart Series Lights include Ring Lights, DOALs, Large Area Bar Lights (MAX Lights), and a dedicated label-reading light called Pharmalite. Ring Lights, Ring Light accessories, and mounting brackets are show below.

Working Distance

Field of View Width

Working Distance

Field of View Height
General lens formulas for any combination, given working distance, focal length, or field of view width:

Field of View Width = 8.5 x Working Distance / Focal Length

Field of View Height = 7.093 x Working Distance / Focal Length

Focal Length = 8.5 x Working Distance / Field of View Width

Working Distance = Field of View Width x Focal Length / 8.5

Industrial High-Flex Ethernet Cables

Industrial High-Flex cables provide an interface between F440-F cameras and other devices.

These cables are designed for harsh environments that could damage a traditional CAT 5 cable. The overmold design provides increased strain relief. Thumbscrew locking keeps the connection secure despite shock and vibration. The double-shielded design provides extra protection in industrial applications.

High-Flex cables are designed to withstand 12 million+ flex cycles. The TPE jacket provides additional protection from elements such as oil, water, and abrasion.
